The collection of plastic recyclables will begin

プラスチック資源の収集が始まります

Starting April 2024, please dispose of "plastic products" and "plastic containers and packaging" in the same bag.

Collection days and locations will remain the same as per "Plastic Containers and Packaging" collection schedules, but the category name will be renamed to "Plastic Resources".

In order to verify the impact on facilities, etc., collection will begin in Kawasaki Ward first, as it is close to the recycling facilities, followed by Saiwai and Nakahara Wards in the 2025 fiscal year, and then the entire city in 2026.

What can be disposed of?

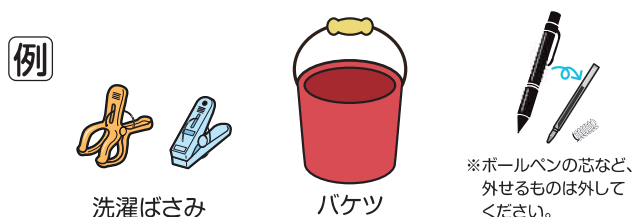

Plastic products, containers and packaging, etc. with a length of less than 50 cm per side can be disposed of. No plastic mark is required!

What if there are metal parts, etc.?

If the metal parts, etc. are not removable, you may dispose of them as is.

Please remove anything that can be removed, such as ballpoint pen leads.

What happens to the resources gathered?

It will be transformed into plastic board used for outdoor billboards, etc., and chemical raw materials for fertilizers and fibers, etc.

Can't I just dispose of everything as ordinary garbage?

When incinerating ordinary garbage, many greenhouse gases that contribute to global warming are produced. Currently, 80% of these gases are from burning plastic. We need your help to prevent global warming and create a better future. We ask for your cooperation in separating the waste.

Due to the risk of injury, fire, and malfunction of facilities, please do not include the following items.

Items powered by electricity or batteries (dry cell or rechargeable battery)

Lighter, knives, syringes, etc.

詳細は、3月頃に配布するリーフレット「資源物とごみの分け方・出し方」でお知らせします。

お届けます

For details, please refer to the "Recyclables and Waste Sorting and Disposal Guidelines" to be distributed around March.
