## This is a notice from Kawasaki City Waterworks Bureau about replacing your water meter.

The water meter used at your home will soon need to be replaced.

We kindly ask for the cooperation of our customers when the subcontractor shown on the reserve side of this notice makes a visit to your home to replace your water meter.

\*Water meters have an effective lifespan of 8 years, as determined by the Measurement Act.

\*Please read the sections titled "replacing your water meter" and "points to check after replacement" on the page to the right.

Account number	○○○○○○○○○
Location of water meter	○○○○○○○○○○○
Name of user	○○○○○○○○○ 様

Japanese (details)

English

Chinese

Korean

## Replacing your water meter

### Free of charge

Replacing your water meter is free

### Suspension of water supply

During the replacement, your water supply will be suspended. In general, it takes about 10 minutes to replace a water meter at the average home, and water will stop during this time. However, according to the condition of the meter, this may take longer.

### Residential customers do not have to stand by during the replacement

We will replace the water meter even if the customer is not at home. Residential customers do not have to make reservations or stand by during the replacement. If you wish to be present during the replacement, please contact your subcontractor.

- We would like to ask for permission to trespass the premises of our customers when replacing water meters
- Please clear all items that may hinder the replacement of the meter
- Depending on the condition of the meter, we may not be able to replace it in one day

## Points to check after replacement

### Rinsing

Before using water immediately after the meter has been replaced, make sure to rinse out taps by running the water through them, since there are cases when air bubbles affect the transparency of the water. If you do not rinse your taps with running water after replacement, air bubbles and rust may cause problems with the toilet and boiler.

【How to rinse (may take between 30 seconds and a few minutes)】  
Keep the water running from a single water faucet for some time until the water returns to its normal flow. When using a mixing faucet, turn the faucet to the cold water side and keep the water running. Do not allow hot water to flow.

※ Turn the faucet on and off slowly

## Notice of scheduled dates for replacement of water meters

The scheduled date and time of replacement includes all days between 08:00 and 17:00, except for Saturdays, Sundays and holidays.

One day between XX (month) XX (day) and XX (month) XX (day)

The above timeframe has been set to consider changes in scheduling owing to the status and progress of the contractor's workload.

If you wish to stand by during the replacement, please contact the subcontractor.
